

Open Brain — Pre-Onboarding Worksheet

Done-for-you setup • AM-guided • complete before brain provisioning

Prepared for: _____

Date: _____

Account manager: _____

Est. time: 45–60 minutes, guided

This worksheet captures everything needed to provision your isolated Open Brain. We never collect passwords or API keys here — Section 5 records access only. Each answer maps to a setting in your configuration.

1. Company profile

The basics that identify your business across the brain and on your published EEAT content.

Legal company name

DBA / how customers know you

Contractor license #

Main phone

Website (optional)

Primary contact (name)

Primary contact (email)

Primary contact (phone) (optional)

2. Service area & jurisdictions

Where you work. Each jurisdiction seeds a regulatory_snapshot (the code in effect) so atoms are era-stamped correctly.

Cities / counties you serve

☐ Other: _____

List every market you pull permits in.

Jurisdictions & code

Jurisdiction (city/county)	Building dept / AHJ	Building code (e.g. IRC-2021 + amendments)	Wind zone (e.g. Vult 115 mph)	Notes (ice/water shield, radiant barrier, etc.)

One row per permitting authority. We seed the building code in effect.

3. Manufacturers & certifications

Your manufacturer certifications drive warranty registration and the EEAT cert badges on your site.

Manufacturer certifications

Manufacturer (GAF, Owens Corning, CertainTeed...)	Cert level (Master Elite, Platinum Preferred...)	Certification / contractor ID	Warranty portal URL

4. Current systems inventory

What you run today. This decides which bridges we wire and which the brain mirrors. GHL stays your front-of-funnel CRM; your production tool stays the during-job system, mirrored into the brain.

CRM / leadgen

- ☐ Go High Level
- ☐ Other
- ☐ None yet

Production / PM software

- ☐ AccuLynx
- ☐ JobTread
- ☐ Buildertrend
- ☐ Other
- ☐ None yet

Accounting

- ☐ QuickBooks Online
- ☐ QuickBooks Desktop
- ☐ Other
- ☐ None

Field photos / documentation (optional)

- ☐ CompanyCam
- ☐ Other
- ☐ None

Aerial measurement / takeoff (optional)

- ☐ EagleView
- ☐ Other
- ☐ None

Email / docs

- ☐ Google Workspace
- ☐ Microsoft 365
- ☐ Other

Team chat (the brain talks here)

- ☐ Slack

- ☐ Will set up Slack
- ☐ Other

Meeting / call recording (for debriefs) (optional)

- ☐ Granola
- ☐ Fireflies
- ☐ None

5. Access & credentials checklist

We DO NOT collect passwords or API keys on this worksheet. Here we record which systems we need access to, who owns each account, and how the key will be handed over securely (OAuth in-app, or an encrypted vault link). Keys move through the secure channel only — never email, never this PDF.

Access we'll need (record owner + handoff method only)

System	Account owner (name)	Handoff: OAuth / secure vault / admin-invite	Status (requested / received / verified)
Go High Level		OAuth or Location API key (vault)	
AccuLynx		API key + webhook secret (vault)	
Slack workspace		Admin app-install (OAuth)	
Supabase (we create)		Cleverwork-provisioned	
Google/MS		Admin-invite / OAuth	
CompanyCam / QuickBooks / EagleView		OAuth or API key (vault), if enabled	

6. Agent scope (what goes live first)

We start small (80/20): the agents that cover the biggest pain first, then add via the 10x ROI gate. For most roofers that's Operations + Sales. The infrastructure agents (Capture, Conductor, Historian, Auditor) are always on.

Vertical agents to launch first

- ☐ @ob-ops
- ☐ @ob-sales
- ☐ @ob-accounting
- ☐ @ob-marketing
- ☐ @ob-exec

The #1 workflow you want handled first

e.g. 'storm canvass → inspection → claim → supplement', or 'daily logs + scheduling'.

7. Consent decisions

These set how your brain shares and publishes. All are opt-in; opting out never costs you your own brain.

Cross-client property history — share your NON-trade-competitive property facts with other Cleverwork clients in different trades (and gain access to theirs)?

- ☐ Yes
- ☐ No

A roofer never shares with another roofer. A remodeler on the same house later could see your warranty/inspector notes — and you see theirs.

Trades to NEVER share with (optional)

- ☐ Other: _____

Consent to record post-op debriefs (PM + Foreman + customer) for atomization?

- ☐ Yes
- ☐ No

Default: allow consented customer stories to be published to your website as EEAT content (each piece still gets one-click approval)?

- ☐ Yes
- ☐ No

8. People & roles

Who the brain works with. Each named teammate can get a Slack seat to mention the agents; the approver signs off on published content.

Content / publication approver (name)

Approver (email)

Team members who'll use the agents

Name	Email	Role (owner, PM, estimator, foreman, office...)	Slack seat? (Y/N)

Who joins post-op debriefs (optional)

Role (PM / Foreman / Customer decision-maker)	Default person (if standing)

9. Goals & week-0 baseline

What 'working' means for you, and the starting numbers we measure against. This is how we prove the brain earned its keep (see the validation doc).

Your top 3 outcomes from this engagement

Week-0 baseline (today's reality, your best estimate)

Task / workflow	Human hours / week	Rough error/rework rate	Cost note (loaded rate, cost of an error)
Lead response & follow-up			
Estimating / proposals			
Insurance claim + supplement paperwork			
Scheduling & daily logs			
Invoicing / AR follow-up			

10. Expectations & support

How we work together. This is a done-for-you service: Cleverwork configures, runs, and supports the brain; you own your business-system licenses and provide access.

I understand the support model: Conductor (the agent front-desk) handles most requests in Slack; Sev-1 issues page a human immediately; Sev-2 same business day. (see Client Support doc)

- ☐ Yes
☐ No

I understand Cleverwork owns what it runs (brain, agents, dashboard); we own our tool licenses (GHL, AccuLynx, etc.) and will provide/maintain access.

- ☐ Yes
☐ No

Your business hours / timezone (optional)

Who we call for an urgent business decision

11. Sign-offs

Authorizations that let us proceed. Digital signatures are captured in the app; on paper, sign and date.

I authorize Cleverwork to provision and operate a dedicated, isolated brain for our company and to process our business data for the services described.

I consent to debrief recording as configured in Section 7.

My cross-client sharing choice in Section 7 is correct and authorized.
